DETAILED ACTION

Response to Amendment

1. Applicant's amendment was received on 8/9/06 and has been entered and made of record. Currently, claims 1-21 are pending.

Response to Arguments

2. Applicant's arguments, see pages 15-20, filed 8/9/06, with respect to claims 1-21, more specifically claims 1, 10-13, and 17-19, have been fully considered and are persuasive. The rejection of claims 1-21 has been withdrawn.

Allowable Subject Matter

3. Claims 1-21 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose, teach, or suggest the claimed limitations of (in combination with all other limitations in the claims), selecting one of a plurality of print profiles provided for one printing apparatus stored in a storage unit, each print profile comprising a combination of a plurality of pieces of print setting information, estimating a print time required for a printing process of the received draw

information for the selected print profile and for a print profile not selected, displaying the print time for the selected print profile and the print time for the non- selected print profile and forming, if execution of the printing process is determined after the plurality of print times are displayed in said display control step, the print data which can be interpreted by the printing apparatus based on the draw information received in said receiving step and the print profile selected in said selecting step and which, if execution of the printing process is canceled after the plurality of print times are displayed in said display control step, cancels forming of the print data, as set forth in claims 1, 10-13, and 17-19.

The closest prior art, previous noted as Streefkerk et al. (US 6058277), discloses receiving means for receiving draw information based on a print document formed by an application, obtaining means for obtaining a plurality of pieces of print set information, and estimating means for estimating, based on the draw information received by said receiving means and the plurality of pieces of print set information obtained by said obtaining means, a plurality of print times, each required for a printing process of the draw information, the plurality of print times respectively corresponding to the plurality of pieces of print set information, display control means for controlling such that the plurality of print times estimated by said estimating means for the draw information are displayed before the print data is formed, and forming means for forming, if execution of the printing process is determined after the plurality of print times are displayed by said display control means, said print data which can be interpreted by the printing apparatus based on the draw information received by said receiving means and a selected one of

the plurality of pieces of print set information. However, Streefkerk fails to disclose selecting one of a plurality of print profiles provided for one printing apparatus stored in a storage unit, each print profile comprising a combination of a plurality of pieces of print setting information, estimating a print time required for a printing process of the received draw information for the selected print profile and for a print profile not selected, displaying the print time for the selected print profile and the print time for the non-selected print profile and forming, if execution of the printing process is determined after the plurality of print times are displayed in said display control step, the print data which can be interpreted by the printing apparatus based on the draw information received in said receiving step and the print profile selected in said selecting step and which, if execution of the printing process is canceled after the plurality of print times are displayed in said display control step, cancels forming of the print data.

Therefore, for these reasons, claims 1-21 are rendered allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
